REUSABLE ITEMS

For example

- Textiles and shoes
- Furniture
- Books
- Sporting goods
- Tableware

Sell or **donate** for example in flea markets or through web.

Worn out clothes are mixed waste.

BIOWASTE

For example

- Food leftovers
- Gutting remains and peelings
- Coffee filters and tea bags
- Paper towels and serviettes
- Flowers, grass and leaves

Drain watery biowaste.

Pack biowaste in a newspaper or in a bio-decomposable bag.

No liquids, ash, medicines, cigarette stubs or diapers.

PAPER

For example

- Newspapers and magazines
- Flyers
- Envelopes
- Copying paper and printing paper
- Phone books and catalogues

Keep the papers separate, don't tie them.

No cardboard.

No dirty or wet paper.

MIXED WASTE

For example

- Dirty plastic packages and other plastic
- Dirty paper and cardboard
- Diapers and sanitary napkins
- Porcelain, ceramics
- Textiles, leather, rubber
- Vacuum cleaner bags
- Light and halogen bulbs
- Cosmetics
- Ash and cigarette stubs
- Cassettes, CDs and DVDs
- Pet waste

Your trash could be someone else's treasure.

Biowaste is composted.

Paper is recycled into tissue paper or newspaper.

Mixed waste is used for heating and electricity in Tammervoima waste-to-energy plant.

METALS

Small metal articles and packages

For example

- Cans and non-deposit-based drinking bottles
- Aluminum pans and foils
- Pots and pans
- Cutlery
- Empty paint tins
- Empty, non-pressurised spray cans

No gas cylinders.

Take large metal objects to eco-centres, solid waste management sites or Repe&Romu collection round.

Sorting instructions: www.rinkiin.fi

GLASS PACKAGING

Empty, with caps and lips removed

- Glass jars
- Glass bottles

No porcelain, ceramics, glassware, bulbs, mirrors or sheet glass.

Remove the caps and lids. It is not necessary to remove labels and bottle neck rings.

Sorting instructions: www.rinkiin.fi

CARTON PACKAGING

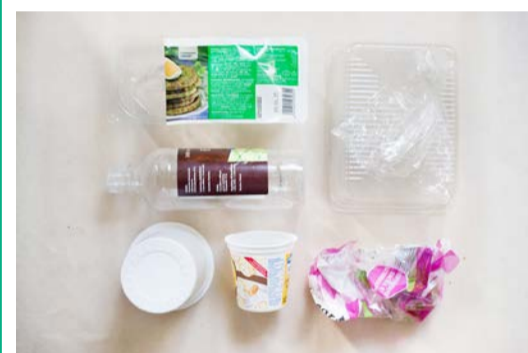

For example

- Milk and juice cartons
- Boxes of cereal and cookies
- Hamburger and pizza boxes
- Disposable tableware made of cardboard
- Paper bags
- Paper tubes and egg cartons
- Wrapping paper and paperboard boxes
- Wrapping cardboard of drinks

Rinse quickly with cold water and drain cartons, **flatten and pack** inside one another.

No dirty and wet carton.

Sorting instructions: www.rinkiin.fi

PLASTIC PACKAGING

In some drop-off collection points. www.kierratys.info

Only empty, clean and dry plastic household packaging.

For example

- Plastic food packaging
- Plastic carrier bags and wrappings
- Plastic bottles, cans and jars

Sorting instructions: www.rinkiin.fi

Metal is recycled into industrial raw material.

Glass is recycled into manufacturing of packaging glass.

Cardboard is recycled into industrial raw material.

Clean plastic to recycling, dirty to energy.

HAZARDOUS WASTE

For example

- Paints, glues and varnishes
- Solvents and diluents
- Chemicals with danger property
- Waste oil, oil filters and accumulators
- Fluorescent lamps and energy saving bulbs

Store waste in their original packaging.

Take medicines and mercury thermometers to the pharmacy.

Batteries and cell phone batteries are received at stores selling the new ones.

Explosives and bullets to the police.

ELECTRIC EQUIPMENT

For example

- Televisions, radios, mobile phones
- Computer equipment
- Fridges and freezers
- Ovens and microwaves
- Washing machines
- Vacuum cleaners
- Small devices

Take electric equipment to the eco-centres, waste management sites or Repe&Romu collection round.

Ask receiving also at stores selling the new ones.

TWIGS AND GARDENING WASTE

For example

- Twigs
- Leaves and branches
- Apples
- Weeds and grass

Don't mix twigs with other gardening waste.

Take to waste management sites in Koukkujärvi or Tarastenjärvi.

Conserving the receiving of twigs, **contact** your local municipality.

BULKY WASTE AND RENOVATION MATERIALS

For example

- Furniture, mattresses
- Stone materials, porcelain and tiles
- Insulation, flooring materials
- Timber

Take your waste yourself to the eco-centres or waste management sites. The waste is processed before Tammervoima waste-to-energy plant.

Collect the load so that it is easy to unload and sort in reception. You will save time and money.

Hazardous waste is channelled to safe treatment.

Materials are recycled.

Twigs are chipped into the compost and gardening waste is composted.

For energy usable the waste is channelled to Tammervoima. The waste which is not usable for energy, is deposited to the landfill.
