

## Welcome to use the automatic waste collection system!

Mixed waste, biowaste, plastic packaging and paper will be collected through the automatic waste collection system (AWCS).

### Sorting and usage instructions

- The inlets of the AWCS are opened with apartment-specific electronic keys. You can see the collection point of your housing company on the second page of this bulletin.
- Read the AWCS's operating instructions and waste sorting guide before using the system. The instructions are distributed with the keys and you can also find them online at [www.pjhoy.fi/putki](http://www.pjhoy.fi/putki)
- Do not put any large objects or other waste unsuitable for the system, such as pots and frying pans, into the inlet. They harm the system and cause extra costs for the housing company.

### Supplementary collection points

- Glass and metal are not suitable for the system and are collected at collection points that supplement the AWCS. Small metal collection includes, in addition to metal packaging, e.g. pots, frying pans and metal cutlery. Cardboard is also collected at the supplementary collection points. Remember to flatten!
- You can see the locations of the supplementary collection points on the website [www.pjhoy.fi/rtpisteet](http://www.pjhoy.fi/rtpisteet)

### Not suitable for automatic system – use other collection

- Extra waste must not be left at AWCS collection points or supplementary collection points.
- Not all mixed waste that could be put in a regular waste container is suitable for the system. These include, for example, pillows, blankets, large flower pots and buckets. You can take them to the collection round Paku. See instructions in the residents' info material or on the website. Paku service collects the waste according to the schedule. Paku arrives on the first Tuesday of every month from November to May 2025.

### Nekala waste station and Repsikka pickup service

- Nekala waste station receives recyclables, electrical equipment and household hazardous waste free of charge.
- There is a fee for mixed and wood waste. [www.pjhoy.fi/jatasema/nekala](http://www.pjhoy.fi/jatasema/nekala)
- If transportation is a problem, order the Repsikka pickup service (subject to a charge) [www.repsikkanouto.fi](http://www.repsikkanouto.fi)

If you have any questions, please contact Pirkanmaa Jätehuolto Oy  
[neuvonta@pjhoy.fi](mailto:neuvonta@pjhoy.fi), tel. 03 240 5110

On the AWCS website you can find e.g. sorting and usage instructions [www.pjhoy.fi/putki](http://www.pjhoy.fi/putki)

## Collection points

The inlets of the automatic waste collection system are opened with apartment-specific electronic keys. You can see the collection point of your housing company here.

The collection points of some housing companies may change as construction progresses in the area.

| Housing company                | Address                 | Collection point | Address                 |
